# LobbyVu

Plug & Play Solar Display

Brochure

by **Cachelan**

LobbyVu

Share real-time and historic SolarVu® portal data on a TV display of your choice easily with Cachelan's LobbyVu hardware! The preconfigured device uses the internet to provide a "lobby screen" showing your SolarVu® portal!
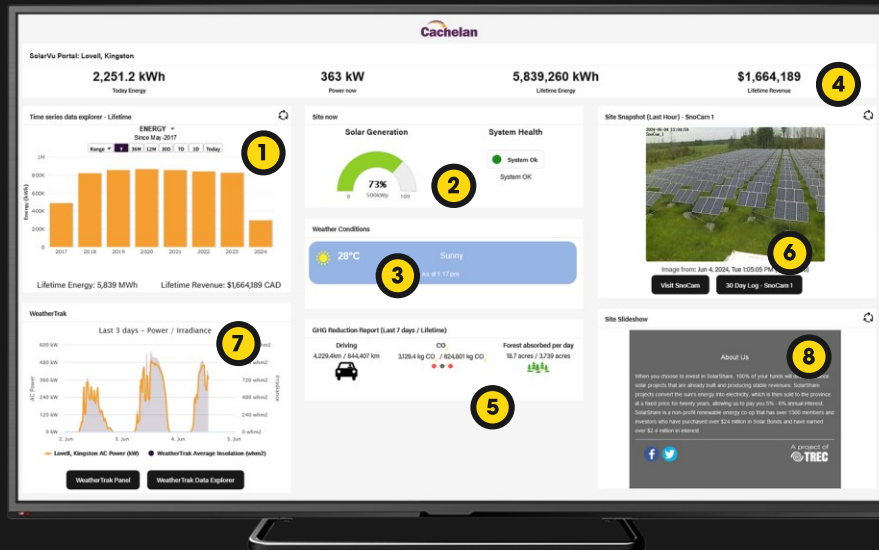

What is a LobbyVu™ device?

Cachelan's LobbyVu™ provides a no hassle set up and install of a visual display of your solar site – sharing the data and "Overview" panels available from your SolarVu® site.

Ethernet
(building internet)

HDMI cable
to your screen

Power Cable
(to 120Vac)

For customers without an existing public display / lobby solution / slideshow (for which a link enabling this view can be provided as a part of your portal and SurePoint subscription), the LobbyVu™ device provides an easy install and no set up solution for turning a display that shares your organization or building's solar impact!

LobbyVu

LobbyVu™ is an extension of your SolarVu® energy portal. Use this media device to display real status and live statistics which rotate**. Enabling LobbyVu™ requires a SolarVu® Portal with an active SurePoint subscription.** Lobby screens can be provided as links on managed devices, or the LobbyVu™ device can be purchased for easy TV enablement.

LobbyVu™ for Solar Generation

1. Energy Generation

Graphical display that showcases how much solar energy your site has been generating over time. Capably of seeing historical data on a number of time frames which rotate for dynamic display.

2. Site Status Now

View the site activity in real time and see if our monitoring system is healthy.

3. Daily Weather

See current weather to know how that may affect your site's production for the day.

4. Site Overview

Daily to lifetime data - know how much your site has been producing, as well as revenue generated, at all times.

5. GHG Widgets
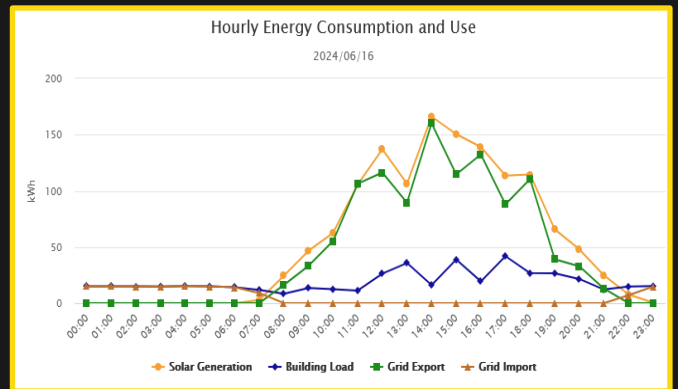

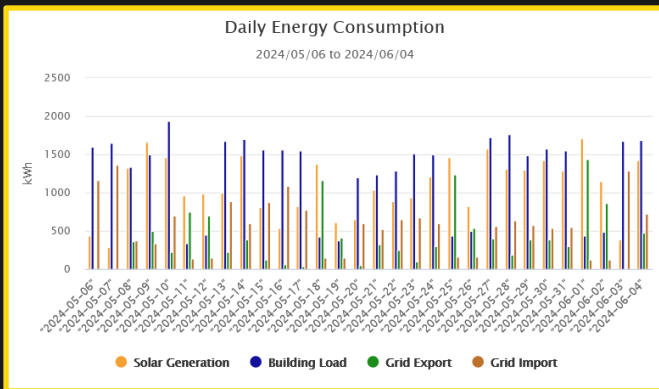

Let people know how your solar site is helping the environment and promote sustainability.

6. Site Camera

Rotate through the most recent snapshots of your site cameras. **Requires SnoCam feature** for live site view.

7. WeatherTrak

Measure and compare your site's conditions. **Requires WeatherTrak feature** for sunniness level measurements.

8. Slideshow

Add and customize your site's SolarVu® energy portal by adding site pictures of your choice: promo material, brands and logos, arial site shots, or lobby bulletins.
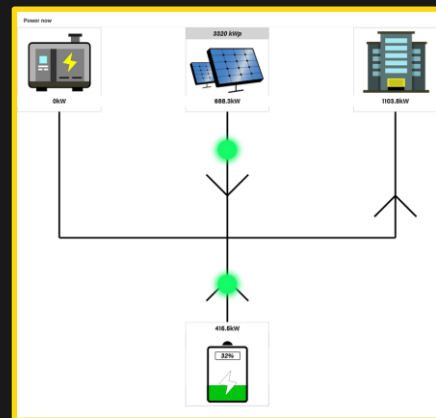

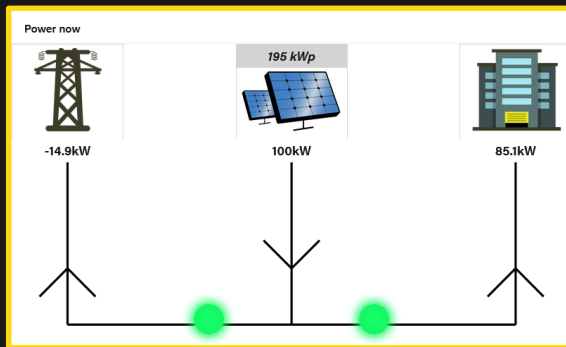

![LobbyVu logo]

LobbyVu™ for Building Consumption

All of the features of Solar Generation PLUS building specific features! Available for sites with a building consumption meter. **Talk to Cachelan team to get it quoted.**

Last 30 Days, Today & Hourly

Graphical display that showcases how much solar energy your site has been generating over time. See historical data on a number of time frames which rotate for dynamic display. View and traverse the building consumption and compare it with solar generation!

Power Flow Animation

See in real time the flow of power through your system. Visualizing clean energy sources as green from either solar or BESS, and yellow when from the grid or backup diesel (for microgrids). See measured building consumption and battery SoC! **Requires a building meter at minimum for building consumption data, and other relevant equipment.**

If your site has a battery system, see it's current fullness from read State of Charge!
